Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on 16 July 2003.
 2a) This action is **FINAL**. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the outer surface is called "convex" and the inner surface is the inner surface is "concave", when both surfaces are curved in the same direction.

Examiner will interpret the claim, as both surfaces are concave, consistent with FIG. 2 of the drawings.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Brown, US No. 3,325,042 ("Brown").

In a device having a chamber defined by a lid (10) and a cavity (interior), a seal member (11) for sealing the chamber comprising:

 a base portion (21) adapted to be received within a slot formed in the lid
 a seal portion having a substantially concave inner surface and a substantially convex outer surface (FIG. 2),

and first and second flexible side walls (FIG. 3), each of the first and second flexible side walls connected between the base portion and the seal portion (FIG. 3), wherein the base portion, seal portion, and first and second flexible side walls define an inflatable inner cavity (FIG. 3).

Each first and second flexible side walls includes first and second wall portions joined at a corner.

The concave outer surface includes at least one sealing edge engageable with a sealing surface surrounding the cavity.

The seal includes at least one port (14) for receiving air into the inflatable inner cavity (FIG. 3).

The air pressure inside the inflatable inner cavity exerts forces that counteract external forces on the seal member, thereby maintaining a seal (i.e. the seal being located in the interior of the chamber automatically exposes it to pressure of the vessel chamber).

The external forces on the seal member are exerted by fluid pressure inside the chamber.

The seal member further comprises a finger (see curved bottom FIG. 3) for preventing fluid flow into the slot.
